

Invitation to Serve as a Vision 2030 Core Team Member

Are you concerned about climate change? Do you want to help young adults learn about climate solutions in our region, and how they can get involved?

If so, we encourage you to join us as a Vision 2030 Climate Solutions Core Team Member.

SAGE's Vision 2030 Team includes teachers, volunteers and nonprofit and governmental organizations who support a local, place-based approach to educate middle and high school students about our region's groundbreaking efforts to reduce greenhouse gas emissions 50 percent from 1990 levels by 2030. Learn more about our efforts at WeAreSage.org/vision2030.

We have led this project since 2019 and are excited about the next stage which includes:

- Scaling delivery of our Keystone Lesson on Climate Solutions in schools in Multnomah, Clackamas and Washington counties
- Championing service-learning opportunities for students with nonprofit partners
- Developing information to spotlight job opportunities on climate solutions for students
- Planning a climate solutions fair for middle schools and a workforce fair for high schools
- And more

We are looking for people who:

- Are excited to lead an aspect of this project (see examples of activities above)
- Are available 4-6 hours per month this September – June to:
 - Participate in core team planning meetings (offered over Zoom)
 - Lead an aspect of this project on behalf of the core team (we will provide help)
 - Remain nimble, helpful as new opportunities emerge with partners
- ✓ Very flexible time commitment. We're asking each Core Team Member to devote 4-6 hours a month to participate in team meetings and to lead an aspect of the project.
- ✓ How we support you. We provide an in-depth orientation to the Vision 2030 Team and closely review with you our program materials and workplans. We also provide hands-on support to position you, over time, to lead an initiative on behalf of the core team. Candidates will complete a background check prior to serving as a volunteer.
