

# VISION 2030

BUILDING A BRIGHTER CLIMATE FUTURE

## Invitation to Host a Classroom Presentation on Climate Solutions Available March 29 – May 14<sup>th</sup>

**Hello teachers!** The Vision 2030 team is excited to offer you and your students our Keystone Lesson on Climate Solutions, an opportunity for students to experience a free, interactive, and online presentation to explore our region's Climate Action Plan and goals for 2030.

Through our presentation and guided activities, students learn about several local climate solutions in the built environment, transportation, consumption and waste, food and agriculture, urban tree canopy and natural systems. Students also learn about meaningful workforce opportunities and community service projects and ways to learn more.

### Lesson Formats

The Keystone Lesson on Climate Solutions can be presented as a 50-minute lesson (one class period) or as two, 30-minute presentations. All presentations are given by Vision 2030 trained volunteers who have registered as a volunteer with your district.

**We are accepting enrollments for the Keystone Lesson through February 28. We have both morning and afternoon time slots available between March 29 and May 14.**

### Partners

The Keystone Lesson on Climate Solutions is offered by Vision 2030, a team of teachers, volunteers and nonprofit and governmental organizations. We support a local, place-based approach to educate middle and high school students about our region's efforts to reduce greenhouse gas emissions 50 percent from 1990 levels by 2030. Our teamwork is coordinated by the nonprofit organization SAGE. Learn more at [WeAreSage.org/Vision2030](http://WeAreSage.org/Vision2030).
